Summary

Computer Science Engineering student specializing in **Data Science**, with strong knowledge of **Python, SQL, Machine Learning, Artificial Intelligence, and Data Visualization**, backed by hands-on, industry-oriented projects. Skilled **Prompt Engineer** with practical experience in AI-assisted software development. Eager to learn, grow, and contribute effectively in a professional environment. Seeking an entry-level role to apply analytical skills and contribute to organizational success.

Skills

Data Analytics: SQL, Advanced Excel, Power BI, DAX, Data Cleaning, EDA, Data Visualization
Programming: Python, C++, Node.js, JavaScript, HTML5, CSS3
Python Libraries: Pandas, NumPy, Matplotlib
Developer Tools: Git, GitHub
DevOps: Docker

Database: SQL / MySQL
AI: Generative AI, Prompt Engineering, Vibe coding, Automation
Soft Skills: Teamwork, Time Management, Problem Solving

Experience

Full Stack Web Development Intern | Euphoria GenX — 2026–Present

- Developing responsive web applications using HTML, CSS, JavaScript, and backend technologies.

Projects

HR Analytics / Employee Attrition Dashboard | Excel, Power BI, DAX

- Analyzed 1,480 employee records across 37 attributes (department, job role, overtime, job satisfaction, work-life balance, income, tenure, and more) to identify key drivers of employee attrition.
- Performed data validation and summary analysis in Excel using formula-driven functions (COUNTIFS, SUMIFS) to clean and structure the dataset.
- Built an interactive Power BI dashboard with custom DAX measures for Attrition Rate, headcount, and departmental averages, surfacing where and why the business was losing employees to support HR retention decisions.

Customer Churn Analysis | Python, SQL, Excel, Power BI

- Cleaned and analyzed customer data using Python and SQL to identify churn patterns.
- Performed exploratory analysis to identify key factors associated with customer churn.
- Built an interactive Power BI dashboard with KPIs and visualizations.
- Generated actionable business insights to support customer retention decisions.

Bengali Prescription Intelligence System (BPIS) | Python, OpenCV, Tesseract OCR, Streamlit

- Built an OCR-based prototype that extracts medicine name, strength, dosage, and duration from prescription images and explains them in simple, patient-friendly Bengali.
- Designed the image-to-text pipeline using OpenCV preprocessing and Tesseract OCR, paired with fuzzy medicine-name matching and rule-based parsing to structure the extracted data accurately.
- Delivered the system as an interactive Streamlit app, using AI-assisted (vibe coding) development with prompt engineering to architect and implement the full pipeline.

RCB IPL Analytics Dashboard | React, Three.js, Tailwind CSS, Python (Pandas), Power BI, DAX

- Analyzed 286 IPL matches (2008–2026) and 67,000+ ball-by-ball deliveries from Cricsheet to build a broadcast-style analytics platform for Royal Challengers Bengaluru.
- Processed raw match data into an 18-table star-schema pipeline and built a companion Power BI dashboard with custom DAX measures across five broadcast-themed pages.
- Built an interactive 3D React + Three.js + Tailwind web app visualizing player, phase-wise, and match/season performance, using AI-assisted (vibe coding) development with prompt engineering, and deployed it live on Vercel.

Education

B.Tech in Computer Science and Engineering (Data Science) | Brainware University, Kolkata — 2023–2027

Class XII, West Bengal Board, Majdia Rail Bajar High School, Majdia — 2023

Class X, West Bengal Board, Majdia Rail Bajar High School, Majdia — 2021

Key Achievements

- Secured a place at the **Samsung Innovation Campus** by architecting an AI-powered movie recommendation system, leveraging prompt engineering through Claude — 2025
- West Bengal SVMCM Merit Scholarship** — Awarded for maintaining high academic performance throughout the curriculum.
- Entrepreneurship Foundations for Deep Tech Startups** — Turnip Innovations, in association with Qualcomm & L2Pro India (Mar 2026). Scored 100%, demonstrating strong grasp of startup fundamentals and deep-tech venture building.
- Coding Competition Achievement** — Secured 3rd Runner-Up position in the INSTAN-C8 Coding Competition organized at Brainware University, 2026.
